Lots of activity in the family support and navigation space

Everyone knows their part but not the “big” picture

No comprehensive database of the diverse family support services going on across the state

# Desired Summit Outcomes

---

- **Environmental scan** of who is doing what where: organizations, services, geography, funding, training
- **Compiling outcomes** organizations are working toward, how data is collected, and findings documented and shared
- **Identifying strategies** to track outcomes of family support services
- Enabling people and organizations to collaborate, learn from one another, learn together, and **push the system forward**

# Vision

---

Supporting families to be healthy, informed, and able to provide for their family member as well as the family unit

A **statewide infrastructure** that promotes collaboration, efficiency, effectiveness and statewide reach
